Truly Unique LED Mini-lightbar

The HIGHLIGHTER™ LED mini-lightbar is a low profile, modular design of Federal Signal's industry leading HIGHLIGHTER mini-lightbar. The HIGHLIGHTER LED combines the high performance ROC™ (Reliable On-board Circuitry) with the high efficiency SOLARIS® reflector design. The innovative reflector design offers uniform 360-degree light distribution, which means no dark spots or shadows.

Easily Switch Flash Patterns

The HIGHLIGHTER LED mini-lightbar offers a variety of user selectable flash patterns (20+) and additional features. Incorporated into the top of the dome is a truly innovative feature called MAGNET SELECT™, which allows users the ability to easily switch flash patterns through the use of a magnet (patent pending).

Synchronize or Alternately Flash Complete Systems

Multiple HIGHLIGHTER LED lights can be wired together or with a variety of other LED light heads, allowing users to customize complete warning packages. When used in complete systems, the LED lights can be synchronized together or alternately flashed with all the lights displaying the chosen flash pattern. Another built-in feature is the two-channel high-side flasher. Any light heads (up to 7.5 amps per channel) can be synchronized to flash in conjunction with the HIGHLIGHTER LED. These features are easily accessible at the bottom of each unit.

Wide Variety of Mounting Options

The compact HIGHLIGHTER LED mini-lightbar measures a mere 2.7 inches high (permanent mount) making it ideal for amber, police, and fire applications that place a premium on space savings. The HIGHLIGHTER LED is available in permanent, magnetic, suction-cup magnetic mounts, and a variety of other custom mounting options. All HIGHLIGHTER LED models meet SAE J845, Class 1 specifications.

FEATURES

- Low-profile modular design utilizing industry leading HIGHLIGHTER styling and mounting footprint.
- Incorporates ROC LED technology.
- Available in solid or split color combinations.
- 24 VDC models available (solid color only).
- Uniform 360-degree light distribution; no dark spots or shadows.
- More than twenty user selectable flash patterns.
- Magnet Select feature; easily switch flash patterns using a magnet (magnet key chain included).
- Synchronize or alternately flash with multiple HIGHLIGHTER LED units or a variety of other LED light heads.
- Contains two-channel high-side flasher that synchronizes other light heads (up to 7.5 amps per channel).
- Variety of mounting options.

APPROVALS

- Meets SAE J845 Class 1 specifications
